DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 – 4, 6, 9, 10, 15 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 5,140,9285 to Frick.
3. Regarding claim 1, Frick discloses a fishing system to be mounted to a boat, the system comprising: a housing **32**; a mast **14** disposed on the housing **32**; a first actuator **78** connected to and rotating the mast **14** and a second actuator **52** connected to and pivoting the mast **14**. Frick discloses the claimed invention except for the mast being disposed in the housing and the second actuator pivoting the housing. It would have been obvious to one having ordinary skill in the art at the time the invention was made to locate the mast within the housing and pivot the entire housing instead of solely the mast, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japiske*, 86 USPQ 70.
4. Regarding claim 2, Frick discloses the system including a holding plate **60**.
5. Regarding claim 3, Frick discloses the claimed invention except for the holding plate having bearing journals and support trunions. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use bearing journals and support trunions, since it was known in the art that journals assist in rotational components and trunions assist in supporting structures.

6. Regarding claim 4, Frick discloses the second actuator **52** being coupled to the holding plate **60**.
7. Regarding claim 6, Frick discloses the claimed invention except for the mast **14** being made of carbon fiber. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the mast from carbon fiber, since it has been held to be within the general skill of a worker in the art to select a known material, which carbon fiber is, on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.
8. Regarding claim 9, Frick discloses the actuators being electro-hydraulic.
9. Regarding claim 10, Frick discloses a base part **38** rotatably connected to the mast **14**.
10. Regarding claim 15, Frick discloses the claimed invention except for a clamp. Frick discloses retaining means, which can be any art recognized equivalent, to include a clamp.
11. Regarding claim 25, see paragraphs 3 and 7 above.
12. Claim 7 is rejected under 35 U.S.C. § 103 as being unpatentable over Frick in view of US Patent No. 5,445,102 to Rupp. Frick discloses the invention substantially as claimed. See paragraph 3 above. However, Frick does not disclose the mast being formed of three parts telescopically connected. Rupp teaches telescopically connecting members in the same field of endeavor for the purpose of connecting outrigger members. It would have been obvious to one having ordinary skill in the art at the time the invention was made to telescopically connect the mast members in order to allow extending, retracting and pivoting of the mast. Further, Frick discloses the claimed invention except for the mast being formed in three parts. It would have been obvious to one having ordinary skill in the art at the time the invention was made to form

the mast of any number of parts, since it has been held that mere duplication of the essential
~~working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*,~~
193 USPQ 8.

Allowable Subject Matter

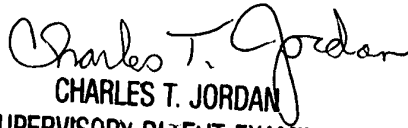

13. Claims 21 – 24 are allowed.

14. Claims 5, 8, 11 – 14, 16 – 20 and 26 – 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
